

We are looking for employees (m/w/d): Sales and Product Solutions Support

Do you have a communicative personality, thrive on teamwork with your interest in the complete sales and delivery cycle? We are a dynamic team with a clear focus on providing high quality product solutions with the highest degree of customer service. Become a part of our team as SALES and PRODUCT SOLUTIONS SUPPORT (m/w/d) and contribute to our company's success as a dedicated employee, learning all the skills to contribute to our customer's success.

Your responsibilities:

- Supporting sales activities
- Liaise with multi national manufacturers
- Managing customer requests and proposals
- Assist in contact negotiations and clarifications
- Manage product deliveries from order processing to delivery
- Maintenance and further development of customer sales

Your profile:

- Sound industry knowledge
- Delivery and/or customer sales experience

- Appropriate industry experience
- Sound electrical qualification
- Good English language skills
- Sound computer knowledge
- Team player
- Qualification for Australian working permission

Our offer:

- Working and living in Sydney, Australia
- Extensive job diversity
- Dynamic working environment
- Work with high quality European manufacturers
- Become an integral part of a growing team

We are a worldwide operating market leader in fault detection products and network monitoring solutions used in electric power distribution systems.

This Australian job offer is on behalf of our local partner in Sydney, MV Technology Solutions (MV). MV is a modern product solutions company that partners with successful European electrical engineering manufacturers specialised in electrical distribution and railway industry. They represent and sell these solutions in Australia and New Zealand. The success is built on providing customers with innovative solutions and personalised service. Our customers success is our success.

Further information will be answered by Mr. Uwe Wagner +49 2056 976 210.
